

**REVISION RECORD
FOR THE STATE OF CALIFORNIA**

EMERGENCY SUPPLEMENT

May 30, 2006

2001 Title 24, Part 9, California Fire Code

**PLEASE NOTE: The date of this Supplement is for identification purposes only.
See the History Note Appendix for the adoption and effective dates of the provisions.**

It is suggested that the section number as well as the page number be checked when inserting this material and removing the superseded material. In case of doubt, rely on the section numbers rather than the page numbers since the section numbers must run consecutively.

It is further suggested that the superseded material be retained with this revision record sheet so that the prior wording of any section can be easily ascertained.

Please keep the removed pages with this revision page for future reference.

NOTE

Due to the fact that the application date for a building permit establishes the California Building Standards Code provisions that are effective at the local level, which apply to the plans, specifications and construction for that permit, it is strongly recommended that the removed pages be retained for historical reference.

PART I

GENERAL

ARTICLE 1 — ADMINISTRATION

SECTION 101 — GENERAL

101.1 Title. This code shall be known as the UNIFORM FIRE CODE, may be cited as such, and will be referred to herein as “this code.”

[For SFM] For the state of California, this code shall be known as the CALIFORNIA FIRE CODE, may be cited as such, and will be referred to herein as “this code.”

101.2 Scope. *[for SFM] and Application.*

101.2.1 Scope. This code prescribes regulations consistent with nationally recognized good practice for the safeguarding to a reasonable degree of life and property from the hazards of fire explosion, and dangerous conditions arising from the storage, handling and use of hazardous materials and devices, and from conditions hazardous to life or property in the use or occupancy of buildings or premises and provisions to assist emergency response personnel.

The provisions of this code shall supplement any and all laws relating to fire safety and shall apply to all persons without restriction, unless specifically exempted.

The provisions of this code do not apply to off-site transportation of hazardous materials in accordance with DOT requirements.

101.2.2 Applications and enforcing agency. *SFM-California State Fire Marshal.*

101.2.2.1 Application. Any building or structure used or intended for use as an asylum, jail, mental hospital, hospital, home for the elderly, children’s nursery, children’s home or institution, school or any similar occupancy of any capacity.

Any theater, dance hall, skating rink, auditorium, assembly hall, meeting hall, nightclub, fair building, or similar place of assemblage when 50 or more persons may gather together in a building, room or structure for the purpose of amusement, entertainment, instruction, deliberation, worship, drinking or dining, awaiting transportation, or education.

Reference-Health and Safety Code (H&SC) Section 13143 and Government Code (GC) Section 51176, 51177, 51178, and 51179 and Public Resource Code Section 4201 through 4204.

101.2.2.2 Enforcing Agency. Pursuant to Section 13146, Health and Safety Code, the responsibility for enforcement of building standards adopted by the state fire marshal and published in the California Building Standards Code relating to fire and panic safety and other regulations of the state fire marshal shall be as follows:

1. The city, county, or city and county jurisdiction in the area affected by the standard or regulation shall delegate the enforcement of the building standards relating to fire and panic safety and other regulations of the state fire marshal as they relate to Group R, Division 3 dwellings as described in Section 310 of Part 2 of the California Building Standards Code, to either of the following:

1.1 The chief of the fire authority of the city, county, or city and county, or authorized representative.

1.2 The chief building official of the city, county, or city and county or an authorized representative.

2. The chief of any city or county fire department or of any fire protection district, and any authorized representative, shall enforce within its jurisdiction the building standards and other regulations of the state fire marshal, except those described in Section 101.2.2.2, Item 1 or Item 4.

3. The state fire marshal shall have the authority to enforce the building standards and other regulations of the state fire marshal in areas outside of corporate cities and districts providing fire protection services.

4. The state fire marshal shall have the authority to enforce such building standards and other regulations of the state fire marshal in corporate and districts providing fire-protection services on request of the chief fire official or the governing body.

5. Any fee charged pursuant to the enforcement authority of this section shall not exceed the estimated reasonable cost of providing the service for which the fee is charged, pursuant to Section 66014 of the Government Code.

101.3 Subjects Not Specifically Regulated by this Code. Where no applicable standards or requirements are set forth in this code, or contained within other laws, codes, regulations, ordinances or bylaws adopted by the jurisdiction, compliance with applicable standards of the National Fire Protection Association or other nationally recognized fire safety standards as are approved shall be deemed as prima facie evidence of compliance with the intent of this code. See also Section 9001.2.

Nothing herein shall derogate from the power of the chief to determine compliance with codes or standards for those activities or installations within the chief's jurisdiction or responsibility.

101.4 Supplemental Rules and Regulations. The chief is authorized to render interpretations of this code and to make and enforce rules and supplemental regulations in order to carry out the application and intent of its provisions. Such interpretations, rules and regulations shall be in conformance with the intent and purpose of this code and shall be available to the public during normal business hours.

101.5 Liability. The chief and other individuals charged by the chief with the control or extinguishment of any fire, the enforcement of this code or any other official duties, acting in good faith and without malice in the discharge of their duties, shall not thereby be rendered personally liable for any damage that may accrue to persons or property as a result of any act or by reason of any act or omission in the discharge of their duties. Any suit brought against the chief or such individuals because of such act or omission performed in the enforcement of any provision of such codes or other pertinent laws or ordinances implemented through the

enforcement of this code or enforced by the code enforcement agency shall be defended by this jurisdiction until final termination of such proceedings, and any judgment resulting therefrom shall be assumed by this jurisdiction.

This code shall not be construed to relieve from or lessen the responsibility of any person owning, operating or controlling any building or structure for any damages to persons or property caused by defects, nor shall the code enforcement agency or its parent jurisdiction be held as assuming any such liability by reason of the inspections authorized by this code or any permits or certificates issued under this code.

See also Section 103.3.2.1.

101.6 Conflicting Provisions. Where there is a conflict between a general requirement and a specific requirement, the specific requirement shall be applicable.

101.7 Severability. If any provision of this code or the application thereof to any person or circumstance is held invalid, the remainder of the code and the application of such provision to other persons or circumstances shall not be affected thereby.

101.8 References to Appendix. When this code references the appendix, the provisions in the appendix shall not apply unless specifically adopted.

101.9 Amendments. When reference is made to a portion of this code or other applicable laws or ordinances, the reference applies to all amendments and additions now or hereafter made.

SECTION 102 — RETROACTIVE APPLICATION TO EXISTING CONDITIONS

102.1 Existing Conditions. The provisions of this code shall apply to conditions arising 180 days after the publication thereof or at a later date as established by the California Building Standards Commission, conditions not legally in existence at the effective date of this code, and to conditions which, in the opinion of the chief, constitute a distinct hazard to life or property. See also Appendices 1-A and 1-B.

SECTION 103 — INSPECTION AND ENFORCEMENT

103.1 General.

103.1.1 Technical assistance. To determine the acceptability of technologies, processes, products, facilities, materials and uses attending the design, operation or use of a building or premises subject to the inspection of the department, the chief is authorized to require the owner or the person in possession or control of the building or premises to provide, without charge to the jurisdiction, a technical opinion and report. The opinion and report shall be prepared by a qualified engineer, specialist, laboratory or fire safety specialty organization acceptable to the chief and the owner and shall analyze the fire-safety properties of the design, operation or use of the building or premises and the facilities and appurtenances situated thereon, to recommend necessary changes.

The chief is authorized to require design submittals to bear the stamp of a professional engineer.

103.1.2 Alternate materials and methods. The chief is authorized to approve alternate materials or methods provided that the chief finds that the proposed design, use or operation satisfactorily complies with the intent of this code and that the method of work performed or operation is, for the purpose intended, at least equivalent to that prescribed in this code in quality, strength, effectiveness, fire resistance, durability and safety. Approvals under the authority herein contained shall be subject to the approval of the building official whenever the alternate material or method involves matters regulated by the Building Code.

ARTICLE 86A — REQUIREMENTS FOR WILDLAND-URBAN INTERFACE FIRE AREAS

SECTION 8601A — GENERAL

8601A.1 Scope. The mitigation of conditions where a wildfire burning in vegetative fuels may readily transmit fire to buildings and threaten to destroy life, overwhelm fire suppression capabilities, or result in large property losses shall comply with Article 86A and Article 86B.

8601A.2 Purpose. The purpose of this code is to provide minimum standards to increase the ability of a building to resist the intrusion of flame or burning embers being projected by a vegetation fire and contributes to a systematic reduction in conflagration losses through the use of performance and prescriptive requirements.

SECTION 8602A — DEFINITIONS

8602A.1 General. For the purpose of Article 86A and Article 86B, certain terms are defined as follows:

CDF DIRECTOR means the Director of the California Department of Forestry and Fire Protection.

FIRE PROTECTION PLAN is a document prepared for a specific project or development proposed for a Wildland-Urban Interface Fire Area. It describes ways to minimize and mitigate potential for loss from wildfire exposure.

The Fire Protection Plan shall be in accordance with this Article. When required by the enforcing agency for the purposes of granting modifications, a fire protection plan shall be submitted. Only locally adopted ordinances that have been filed with the California Building Standards Commission in accordance with Section 101.14 or the Department of Housing and Community Development in accordance with Section 101.15 shall apply.

FIRE HAZARD SEVERITY ZONES are geographical areas designated pursuant to California Public Resources Codes Section 4201 through 4204 and classified as Very High, High, or Moderate in State Responsibility Areas or as Local Agency Very High Fire Hazard Severity Zones designated pursuant to California Government Code Sections 51175 through 51189.

The California Code of Regulations, Title 14, Section 1280 entitles the maps of these geographical areas as "Maps of the Fire Hazard Severity Zones in the State Responsibility Area of California."

LOCAL AGENCY VERY HIGH FIRE HAZARD SEVERITY ZONE means an area designated by a local agency upon the recommendation of the CDF Director pursuant to Government Code Sections 51177(c), 51178 and 5118 that is not a state responsibility area and where a local agency, city, county, city and county, or district is responsible for fire protection.

STATE RESPONSIBILITY AREA means lands that are classified by the Board of Forestry pursuant to Public Resources Code Section 4125 where the financial responsibility of preventing and suppressing forest fires is primarily the responsibility of the state.

WILDFIRE is any uncontrolled fire spreading through vegetative fuels that threatens to destroy life, property, or resources as defined in Public Resources Code Section 4103 and 4104.

WILDFIRE EXPOSURE is one or a combination of radiant heat, convective heat, direct flame contact and burning embers being projected by vegetation fire to a structure and its immediate environment.

WILDLAND-URBAN INTERFACE FIRE AREA is a geographical area identified by the state as a "Fire Hazard Severity Zone" in accordance with the Public Resources Code Sections 4201 through 4204 and Government Code Sections 51175 through 51189, or other areas designated by the enforcing agency to be at a significant risk from wildfires. See Article 86B for the applicable referenced Sections of the Government Code and the Public Resources Code.

SECTION 8603A — PLANS [RESERVED]

SECTION 8604A — FIRE HAZARD SEVERITY ZONES

8604A.1 General. Lands in the state are classified by the CDF Director in accordance with the severity of wildfire hazard expected to prevail in those areas and the responsibility for fire protection, so that measures may be identified which will reduce the potential for losses to life, property, and resources from wildfire.

8604A.2 Classifications. The CDF Director classifies lands into fire hazard severity zones in accordance with California Public Resources Code Sections 4201 through 4204 for State Responsibility Areas and in accordance with Government Code Sections 51176 through 51189 for areas where a local agency is responsible for fire protection.

SECTION 8605A— WILDLAND-URBAN INTERFACE FIRE AREA

8605A.1 General. Construction methods and requirements to mitigate wildfire exposure shall be applied within geographical areas where a wildfire burning in vegetative fuels may readily transmit fire to buildings and threaten to destroy life, overwhelm fire suppression capabilities, or result in large property losses.

8605A.2 Construction Methods and Requirements within Established Limits. Within the limits established by law, construction methods intended to mitigate wildfire exposure shall comply with the California Building Code Chapter 7A, Article 86A, and Article 86B.

8605A.3 Establishment of Limits. The establishment of limits for the Wildland-Urban Interface Fire Area's required construction methods shall be designated pursuant to the California Public Resources Code for State Responsibility areas or by a local agency following a finding supported by substantial evidence in the record that the requirements of this Section are necessary for effective fire protection within the area.

SECTION 8606A — VEGETATION MANAGEMENT [RESERVED]

SECTION 8607A — DEFENSIBLE SPACE [RESERVED]

This page left blank intentionally.

ARTICLE 86B — MATERIALS AND CONSTRUCTION METHODS FOR EXTERIOR WILDFIRE EXPOSURE

SECTION 8601B — SCOPE, PURPOSE AND APPLICATION

8601B.1 Scope. This Article applies to building materials, systems and/or assemblies used in the exterior design and construction of new buildings located within a Wildland-Urban Interface Fire Area as defined in Article 86A.

8601B.2 Purpose. The purpose of this Article is to establish minimum standards for the protection of life and property by increasing the ability of a building located in any Fire Hazard Severity Zone within State Responsibility Areas or any Wildland-Urban Interface Fire Area to resist the intrusion of flame or burning embers projected by a vegetation fire and contributes to a systematic reduction in conflagration losses.

8601B.3 Application. New buildings located in any Fire Hazard Severity Zone within State Responsibility Areas or any Wildland-Urban Interface Fire Area designated by the enforcing agency for which an application for a building permit is submitted on or after December 1, 2005, shall comply with the following Sections:

1. 8604B.1 Roofing

2. 8604B.2 Attic Ventilation

8601B.4 Alternates for materials, design, tests, and methods of construction. The enforcing agency is permitted to modify the provisions of this chapter for site-specific conditions in accordance with the California Building Code Section 104.2.7. When required by the enforcing agency for the purposes of granting modifications, a fire protection plan shall be submitted in accordance with the Articles 86A and 86B.

SECTION 8602B — DEFINITIONS

8602B.1 For the purposes of this Article, certain terms are defined in Article 86A.

SECTION 8603B — STANDARDS OF QUALITY [RESERVED]

SECTION 8604B — MATERIALS, SYSTEMS AND

METHODS OF CONSTRUCTION

8604B.1 Roofing.

8604B.1.1 General. Roofs shall comply with the requirements of Article 86B and the California Building Code, Chapter 15. Roofs shall have a roofing assembly installed in accordance with its listing and the manufacturer's installation instructions.

8604B.1.2 Roof Coverings. Where the roof profile allows a space between the roof covering and roof decking, the spaces shall be constructed to prevent the intrusion of flames and embers, be fire-stopped with approved materials or have one layer of No. 72 ASTM cap sheet installed over the combustible decking.

8604B.1.3 Roof Valleys. When provided, valley flashings shall be not less than 0.016-inch (0.41 mm) (No. 28 galvanized sheet gage) corrosion-resistant metal installed over a minimum 36 inches (914 mm) wide underlayment consisting of one layer of No. 72 ASTM cap sheet running the full length of the valley.

8604B.1.4 Roof Gutters. Roof gutters shall be provided with the means to prevent the accumulation of leaves and debris in the gutter.

8604B.2 Attic Ventilation.

8604B.2.1 General. When required by the California Building Code, Chapter 15, roof and attic vents shall resist the intrusion of flame and embers into the attic area of the structure, or shall be protected by corrosion resistant, non-combustible wire mesh with ¼ inch (6 mm) openings or its equivalent.

8604B.2.2 Eave or Cornice Vents. Vents shall not be installed in eaves and cornices.

EXCEPTION: Eave and cornice vents may be used provided they resist the intrusion of flame and burning embers into the attic area of the structure.

8604B.3 Exterior walls. [RESERVED]

8604B.4 Decking, Floors and Underfloor Protection. [RESERVED]

SECTION 8605B — ANCILLARY BUILDINGS AND STRUCTURES [RESERVED]
